

无冲突矿产声明

冲突矿产是指来自刚果（金）民主共和国和相邻国家的钽铌（钨钽铁矿、锡石、黑钨矿和黄金）或其衍生物，包括钽、锡、金、钨、钴。部分金属矿产已成为非洲刚果民主共和国武装叛乱团体的主要财源，用来交易军火、延续其与政府间的血腥冲突、蹂躏当地平民，因此引发国际争议。有些矿物或衍生物可以通过一定的方式进入到全世界使用的产品供应链中。

广东纽航电子科技有限公司作为世界中的一员，公司一直坚持把企业社会责任作为目标，实施道德采购，促进产业链可持续发展。公司高度重视冲突矿产问题，并采取行动处理这一问题。冲突矿产问题在电子和其他产业受到广泛关注，这一问题极其复杂，需要企业、政府和非政府组织的承诺和合作才能解决。

公司承诺在经营及供应链中承担责任，尊重人权。公司不采购也禁止相关企业及伙伴使用 3TG 矿物，公司也要求所有供应商不得采购冲突矿产。

Conflict free mineral declaration

Conflict minerals refer to tantalum niobium (columbite, cassiterite, wolframite, and gold) or their derivatives from the Democratic Republic of Congo and neighboring countries, including tantalum, tin, gold, tungsten, and cobalt. Part of the metal minerals have become the main source of income for armed rebel groups in the Democratic Republic of Congo in Africa, used to trade arms, continue their bloody conflicts with the government, and ravage local civilians, thus causing international controversy. Some minerals or derivatives can enter the global supply chain of products through certain means.

As a member of the world, Guangdong Newair Electronic Technology Co., Ltd. has always adhered to corporate social responsibility as its goal, implemented ethical procurement, and promoted sustainable development of the industrial chain. The company attaches great importance to the issue of conflict minerals and has taken action to address it. The issue of conflict minerals has received widespread attention in the electronics and other industries, and it is extremely complex that requires commitment and cooperation from businesses, governments, and non-governmental organizations to resolve.
